Time stamp images imprint a reference to which we match other concurrent events in our lives. Below are elements of a mid-March 2014 time stamp, with a theme of climate and weather.

Four snapshots excerpted from Sailing links:

Mid-march morning. After Jupiter within Gemini ensconced in a moon halo, two nights prior.
Great Lakes MODIS imagery shows ice and clouds over Lake Michigan, less scathed than SHE-- Superior, Huron, Erie. Courtesy of NOAA Great Lakes CoastWatch-Great Lakes Node.

People will complain about the extended cold, but then deny the climate science. Count how many pixels are blue in the U.S. in this global map of January 2014.
